Directors' Notes

What we are presenting is a staged reading of a new work, not a production. This means that the elements of production will be suggested by various theatrical conceits, but the point is to see and hear the story and music in succession as if it were a performance. It's important to note that this will actually be the first time that anyone is hearing and seeing this work in its entirety. This is a new work, so it is still in development. In the course of this semester, I handed our students three to four entirely different drafts of the show, including cutting and creating several new songs for this version. I'm grateful to them for keeping focused and trusting the process. Creating new musicals is tough business. There are a lot of moving parts and things to take into consideration. They were a classy and hard-working group, and I am so grateful for all of their hard work, especially as we near the finish line for the semester. It has been a marathon. It may also be worthwhile to note that I didn't begin writing this show until October of 2020. So what we are seeing is the product of about a year's worth of development, baked into the midst of working on a number of other projects. I am so thankful to have the opportunity to share that work with you tonight. I would also like to invite you to stay after the performance tonight for a brief feedback session— questions, thoughts, huzzahs about the piece, anything that you might like to offer that you think could be helpful in its development. Paper and pencil will be provided in the lobby if you have any thoughts or suggestions you wish to share with me that you might feel uncomfortable sharing in the room.

Sincerely,
Tommy Newman
